

## GMEB1 (PT1099R) PT® Rabbit mAb

CatalogNo: YM8921 **Recombinant** 

### Key Features

#### Host Species

- Rabbit

#### Reactivity

- Human, Mouse, Rat

#### Applications

- WB, IHC, ICC/IF, FC, IP

#### MW

- 63kDa (Calculated)  
63kDa (Observed)

#### Isotype

- IgG, Kappa

### Recommended Dilution Ratios

IHC 1:200-1:1000

WB 1:1000-1:5000

IF 1:200-1:1000

IP 1:50-1:200

FC 1:100-1:500

### Storage

**Storage\*** -15°C to -25°C/1 year (Do not lower than -25°C)

**Formulation** PBS, 50% glycerol, 0.05% Proclin 300, 0.05% BSA

### Basic Information

**Clonality** Monoclonal

**Clone Number** PT1099R

### Immunogen Information

**Specificity** Endogenous

## Target Information

|                       |                                                                                                                                                                                                                                                                                                                                   |                          |                          |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|
| Gene name             | GMEB1                                                                                                                                                                                                                                                                                                                             |                          |                          |
| Protein Name          | Glucocorticoid modulatory element-binding protein 1 (GMEB-1) (DNA-binding protein p96PIF) (Parvovirus initiation factor p96) (PIF p96)                                                                                                                                                                                            |                          |                          |
|                       | Organism                                                                                                                                                                                                                                                                                                                          | Gene ID                  | UniProt ID               |
|                       | Human                                                                                                                                                                                                                                                                                                                             | <a href="#">10691</a> ;  | <a href="#">Q9Y692</a> ; |
|                       | Mouse                                                                                                                                                                                                                                                                                                                             | <a href="#">56809</a> ;  | <a href="#">Q9JL60</a> ; |
|                       | Rat                                                                                                                                                                                                                                                                                                                               | <a href="#">500558</a> ; | <a href="#">Q9QUZ8</a> ; |
| Cellular Localization | SUBCELLULAR LOCATION: Nucleus. Cytoplasm. Note=May be also cytoplasmic.                                                                                                                                                                                                                                                           |                          |                          |
| Function              | FUNCTION: Trans-acting factor that binds to glucocorticoid modulatory elements (GME) present in the TAT (tyrosine aminotransferase) promoter and increases sensitivity to low concentrations of glucocorticoids. Binds also to the transferrin receptor promoter. Essential auxiliary factor for the replication of parvoviruses. |                          |                          |

## Validation Data

Western blot analysis of lysates from HeLa cell, primary antibody was diluted at 1:1000, 4°over night, Dylight 800 secondary antibody(Immunoway:RS23920)was diluted at 1:10000, 37° 1hour.
